Tri constellation system	GPS/GAL, GPS/GLO/GAL or GPS/BeiDou/GAL
External antenna connector	Yes
Protocol	Location Services NMEA output (optional)

### ACCURACY SPECIFICATIONS (HORIZONTAL RMS)<sup>3</sup>

Real-time SBAS <sup>4</sup>	<1.5 m typical
-----------------------------	----------------

- 1 The actual available capacity of the internal memory is less than the specified capacity because the operating system and default applications occupy part of the memory. The available capacity may change when you upgrade applications or the device.
- 2 Bluetooth, wireless LAN and cellular type approvals are country specific. Trimble TDC600 handheld has Bluetooth, wireless LAN and cellular approval in North America and EU. For other countries, please consult your local Reseller.
- 3 Horizontal Root Mean Squared accuracy. Requires data to be collected using vertical mounting, minimum of 4 satellites, PDOP mask at 99, SNR mask at 12 dBHz, elevation mask at 5 degrees, and reasonable multipath conditions. Ionospheric conditions, multipath signals or obstruction of the sky by buildings or heavy tree canopy may degrade precision by interfering with signal reception.
- 4 SBAS (Satellite Based Augmentation System). Includes WAAS (Wide Area Augmentation System) available in North America only, EGNOS (European Geostationary Navigation Overlay System) available in Europe only, and MSAS available in Japan only.
